

Capture with Voice — Whisper Workflow

Stop losing 80% of your own ideas.

Most captains lose their best thoughts because they're driving, walking, or in a meeting. Whisper is the cheapest mic-level upgrade in your life. Fix the leak this week.

Action checklist

- Open Voice Memos (or Whisper directly). Record 3 minutes.
- Run it through Whisper or Apple's transcript.
- Paste into Claude. Ask: "Pull the 3 things I should act on this week."
- Send one of those three to your wife or a brother.

Why this matters

The cheapest upgrade you can make this week is to stop losing the thoughts you actually have. Capture beats brilliance.

Scripture sit

James 1:19 — quick to listen. Voice capture is listening to yourself, then acting.
