

Tag Your Tasks — Tiered Autonomy in Practice

The most important framework in the bootcamp. Don't skim it.

Three tiers. Informational. Contextual. Sensitive. Most men collapse them into 'let AI do it.' The captain on the bridge classifies every task before he delegates anything.

Action checklist

- List 10 of your recurring tasks (work, family, ministry, household).
- Tag each task:
 - Informational — AI can answer; you read and decide.
 - Contextual — AI can draft; you edit and execute.
 - Sensitive — AI stays out. You handle directly.
- Hard examples for sensitive: discipline conversations with kids, anything moving money, prayer.
- Post one sensitive task in the comments — help another captain see what he might be miscategorizing.

Scripture sit

Luke 16:10 — faithful in little. Tiered autonomy is faithfulness in the small things.
